SUMMARY

I am a highly driven Web Designer and Front-End Developer with strong expertise in HTML, CSS, JavaScript, Bootstrap, PHP, and WordPress. I specialize in crafting visually engaging, fully responsive, and user-friendly websites that combine modern design with seamless functionality.

Since December 2024, I have been working at HuesandHex, where I design and develop dynamic digital experiences that effectively blend creativity with technical precision. My role involves end-to-end website development, from front-end UI/UX design to back-end integration using PHP.

My professional journey began with a 6-month internship at HuesandHex, where I gained hands-on experience working on real-world web projects. This internship helped me build a strong foundation in both design principles and development practices, further fueling my passion for innovative web solutions.

I possess deep knowledge of website design and development, with a focus on clean code, responsive layouts, and user-centric interfaces. For back-end development, I rely on PHP to create functional, scalable, and efficient web applications.

SKILLS

Website Designing & Development :

- Design Tools & Technologies: HTML5, CSS3, JavaScript, Bootstrap – used to create clean, responsive, and visually appealing web interfaces.
- Back-End Development: PHP – for dynamic website functionality, form processing, and server-side scripting
- Back-End Development: PHP – for dynamic website functionality, form processing, and server-side scripting.
- AI Integration (Basic): Understanding of AI-assisted features in web applications including prompt engineering, chatbot integration, and usage of generative tools like ChatGPT, MidJourney, and Canva Magic Tools.

Tools & Platforms :

- WordPress: Theme customization, plugin integration, and complete site setup.

- Version Control & Editors: GitHub, VS Code.
- UI/UX Principles: Responsive layout design, mobile-first approach, user-centric interfaces, and cross-browser compatibility.
- SEO & Optimization: Basic SEO implementation, website performance optimization.

WORK EXPERIENCE

Front-End Website Design Intern HuesandHex.com | December 2024 – May 2025

Designed and maintained responsive, user-friendly web pages for an e-commerce platform, ensuring consistent and smooth navigation across all device types. Developed and optimized product listing pages with clean, visually appealing layouts to enhance user engagement and overall experience.

Regularly performed updates and content refinements on existing web pages to align with ongoing promotions, seasonal campaigns, and business updates. Ensured that both visuals and content remained consistent with brand identity.

Utilized HTML, CSS, and JavaScript to implement interactive design elements and features, delivering a seamless and intuitive browsing experience. Leveraged WordPress for content management and Bootstrap for responsive layout structure, contributing to improved site performance and organization.
