SUMMARY

I am a skilled and innovation-focused Web Designer with hands-on experience in HTML, CSS, JavaScript, jQuery, Bootstrap, and WordPress. After completing a 3-month internship in February, I have been actively enhancing my skills and gaining practical experience in front-end development. During my internship, I worked on responsive design, website customization, and UI/UX-focused layouts, which helped me build a solid foundation in creating dynamic and user-friendly websites.

Additionally, I have a basic understanding of PHP and MySQL, and have worked on creating databases and developing simple dynamic layouts using PHP, enabling interaction between the front-end and back-end. I'm always eager to learn new technologies, embrace challenging projects, and contribute to creative, impactful web solutions.

SKILLS

Front-End Designing

Proficient in HTML5, CSS3, JavaScript, jQuery, and Bootstrap for building responsive, interactive, and mobile-friendly web pages.

- Skilled in creating visually appealing layouts and ensuring cross-browser compatibility. Experienced with WordPress, including theme customization, plugin integration, and optimizing website performance for better speed and user experience.

Design Tools:

- Skilled in using Adobe Photoshop and Canva to design banners, product images, and web graphics that align with brand identity. Experienced in creating and editing visual content to enhance user engagement and improve the overall aesthetic and professional quality of websites

Database Management:

Basic understanding of MySQL for managing and querying databases, including tasks related to data storage for website back-end. Experienced in creating databases and building basic dynamic layouts using PHP, enabling interaction between the front-end and database for dynamic content management.

WORK EXPERIENCE

Front-end website Design Intern

HuesandHex.com | December 2024 - February 2025

- Designed and maintained responsive and user-friendly web pages for an e-commerce platform, ensuring smooth navigation across all devices. Created and optimized product listing pages with visually appealing layouts to enhance the user experience. Performed regular updates and edits to existing web pages, refining content and visuals to align with new promotions and updates.
- Utilized HTML, CSS, and JavaScript to implement interactive design elements, ensuring a seamless browsing experience. Applied WordPress and Bootstrap frameworks to organize the website structure and improve overall performance
- Additionally, I have basic knowledge of PHP and MySQL, and have created databases and developed simple dynamic layout designs using PHP to add basic functionality and interactivity to website
